

DATA SHEET

Mistral Tech Control – Double Braid Control Line

Mistral Tech Control is a high-performance control line specifically engineered for continuous furling lines and running rigging control functions that demand excellent grip, secure cleat holding, and low stretch. Built with a specially blended cover featuring high-tenacity polyester reinforced with Technora™ fibers, this rope delivers enhanced abrasion resistance, better friction control, and superior handling in frequently adjusted control systems.

Key Features

- Braided cover for continuous line splicing
- Technora™ reinforced cover for grip
- Excellent abrasion resistance
- High heat resistance for fast running applications
- UV resistant
- Excellent “hand hold” feel

Construction

- Braid Type: Double Braid
- Core: Polypropylene
- Cover: Technora™ and Polyester

Typical Applications

- Furling lines
- Low stretch control lines
- Fine-tune adjustment lines
- Continuous loop control systems

Diameter (mm)	Weight (lbs/100 ft)	Breaking Load (lbs)
4	0.68	1,050
5	1.07	1685
6	1.52	2350
